

Jet into the future with Glatt.

The GCSD nozzle is the innovative solution for no-problem coating.

- Homogeneous, adjustable spray pattern
- Constant, reproducible spraying behaviour

The new GCSD nozzle. An exclusive Glatt development.

Welcome to Glatt at the ACHEMA! Frankfurt am Main 15 - 19 May 2006 Hall 4.0 Stand L16 - P22

Technical expertise from Glatt gives you the decisive edge in a hard competitive environment by providing utmost efficiency, reliability and productivity. We offer innovative solutions for every field of our expertise.

Glatt GCSD nozzle: making wishes come true!

Perfect coating starts with even spraying for the entire duration of the process. Without any deposits on the nozzles.

- Off with the beard: thanks to ABC technology (anti-bearding cap)
- Nano-coating*: the perfect supplement to ABC technology
- Top product quality: no bearding, no rejects

The one-of-a-kind ABC nozzle cap nano-coating* ensures that the coating material gets where it belongs: onto the product, not on the nozzle cap

Conventional nozzle cap without nano-coating

Glatt GCSD nozzle: the operator's darling!

Very few, extremely sturdy and clearly assigned components.

- Child's play to clean
- Dismantled in seconds without tools and assembled again in a flash
